

FERRATUM PRO

Ref: Z61000

FERRATUM PRO

The rest loop allows you to rest comfortably on the longest and most complicated via ferrata crossings, including the carabiner. The anchoring strap is made with an elastic part, making the energy absorber closer to the harness, making it more comfortable and able to avoid generating the typical pendulum effect.

Its compact dissipative bag makes it easy to transport and manipulate the set. The protective bag of the dissipative strap is closed with velcro, which allows it to be opened to ensure that the tape is in good condition, thus facilitating a periodic check.

The ergonomic design of the carabiners makes them easy to handle. The carabiners are made of aluminium and the two gates are of different colours, thus avoiding possible errors in transitions from one anchor line to another.

The energy absorber is conveniently transported in a bag included in the kit.

Designed for mountaineers with experience in via ferrata progression. Especially indicated for practising long and demanding via ferratas. In places like the Dolomites (Italy), where the first via ferratas in history were built, the Ferratum Pro will always be up to the task.

Characteristics

- Actuating force: 1.2 kN
- Weight: 600 g
- For users weighing between: 40 and 120 kg
- Ergonomic design
- Carabiner gates with colour differentiation
- Rest loop integrated in the kit (carabiner included)
- Made of: polyamide, HMPE and aluminium
- Transport bag
- EN958:2017 certification
- Manufactured in: Sant Quirze de Besora (Barcelona-Pyrenees)

Packaging info

The packaging is made entirely of biodegradable material (kraft paper). The base of the dyes applied is of vegetable origin. All packaging must be recycled as paper.

Información técnica:

Brand:	Fixe
Country of origin:	Barcelona - Pyrenees (Spain)
Color:	Black + Red
Material:	Polyamide, Dyneema, Aluminium
Format:	Bag + Blister

Width:	5cm
Breaking Strenght:	22kN
Activation Force:	1,2kN
Configurator:	No
Size long:	UNISIZE
