

8,4 RIGLOS

Ref: C040840050

The Riglos

The Riglos is a tough and durable rope geared towards wall climbing. Its 8.4-mm diameter and its construction provide great security when progressing up walls and exceptional control for belay devices. It is a superb rope for multi-pitch route climbers and adventure terrain. It is very reliable when one or several rappels have to be mounted and for ropes for three climbers.

The Mallets of Riglos are geological formations consisting of rocks with vertical walls called mallos. They are located in the town of Riglos, in the province of Huesca, and reach their maximum height at 275 meters with the northern Pisón spur. There are air routes and winding paths. Climbers have to rappel down many of its mallets.

Technology

- Diameter: 8.4 mm
- Standardisation: double and twin
- Nature treatment: It does not have a water-repellent treatment. Flexible and easy to handle. 100% PFC-free
- Classic + construction: Facilitates the use of belay devices due to the friction of the rope on them. Braided with 36 threads

Finishes:

- Middle Mark: indicates the halfway point on the rope with a black mark
- 8 Mark: marking system that uses a red mark to indicate that there are 8 meters left to reach the end of the rope
- Reflector: reflective indicator at both ends of the rope
- Ultrasonic cut: stiffens the rope ends and protects them from wear
