

# FERRATUM

Ref: Z60020

## FERRATUM - Z60020

The carabiners are made of aluminium with different colours on the two gates. This avoids possible errors in the transitions from one anchor line to another. The elastic slings work independently of the entire energy absorber allowing movements to be comfortable and fluid. This feature makes the Ferratum the best choice to get started in the world of via ferrata. It is a light and compact kit, with an ergonomic design of the carabiners to facilitate handling and progression.

The Ferratum has a compact energy absorber bag and is suitable for practising via ferrata, access and progression through equipped pathways and also for adventure parks. From the simplest via ferrata to the most demanding in places like the Dolomites (Italy), the Ferratum caters to both beginners and experienced users.

The energy absorber is conveniently transported in a bag included in the kit.

### Characteristics:

- Actuating force: 1.2 kN
- Weight: 592 g
- For users weighing between: 40 and 120 kg
- Ergonomic design
- Carabiner gates with colour differentiation
- Independent elastic slings
- Made of: polyamide, HMPE and aluminium
- Transport bag
- EN958:2017 certification
- Manufactured in: Sant Quirze de Besora (Barcelona-Pyrenees)

### Packaging info:

The packaging is made entirely of biodegradable material (kraft paper). The base of the dyes applied is of vegetable origin. All packaging must be recycled as paper.

### Información técnica:

Brand:	Fixe
Country of origin:	Spain
Color:	Grey bag, Black arms, Red-Grey
Material:	Polyamide, Dyneema, Aluminium
Format:	Bag + Blister
Impact Force:	&lt;
Activation Force:	1,2kN
Configurator:	No
